Appendix Example

Tom Kneiphof[1]

[1]University of Bonn, Germany

1. Normal Section

This is a normal section, and the title is set in `\bfseries` font by default.

Appendix A: My Appendix

This is an appendix section, and the title of this appendix is set in regular font. In `egbubl.cls` the font is explicitly reset for appendix titles via `reset@font\rmfamily`.

Appendix B: Fixed Example

I provide a modified `egbublFixed.cls` that fixes the issue in my opinion.
